

HOW TO GET A FREE TREE FOR YOUR PROPERTY

1

Learn about tree options

Look at the list of trees we plant and think about the options that would fit well on your property.

Click the link below to view the tree species available:

- [Tree Canopy Fund Tree Species List](#)
- [Tree Canopy Equity Fund Tree Species List](#)

2

Talk to a Tree Steward (Optional, but Helpful)

You can meet for a tree expert, called a tree steward, to come look at your property. They can help you figure out which species to choose for your property and where to plant it.

[Click here](#) to request a tree steward.

3

Prepare to Apply

[Click here](#) to get a checklist of items you will need to provide on your application.

4

Apply

Once you've gathered your photos, created a sketch of the planting location, and have a description of where the tree will be planted. You are ready to submit your application!

Visit the [EcoAction Arlington website](#) for the tree application form.

TREE CANOPY EQUITY PROGRAM

If you live in one of our equity neighborhoods, you can apply for **trees and shrubs**. This program helps make your neighborhood cooler and prettier by adding more trees. It's also good for the air and helps animals find homes in the city!
